2. Maury just called to say that he believes the MODE paper is well done and adequately states CIA's position. He does not believe that there is anything else that he can contribute. John, meanwhile, has his people studying the paper and will have any additional inputs available to you when you arrive at the [] following your [] engagement. []

3. Charlie's people are reviewing the Civil Defense papers and will provide comments. Various U.S. options are described, and what appears to be a draft NSDD is included at the end, which calls for an improved Civil Defense effort under FEMO supervision. It seems to me that our basic mission at this point is to assure the NSC that the IC is fully engaged in working the emergency preparedness problem. []
